

Antonio Ghidoni is an Associate Professor in the Department of Mechanical and Industrial Engineering at the University of Brescia (Italy) where he has been a faculty member since 2005.

Antonio Ghidoni completed his Ph.D. at Politecnico of Milan and his undergraduate studies at University of Brescia. His research interests lie in the area of the mesh generation, high-order accurate methods for computational fluid dynamics, LES and hybrid RANS-LES methods, and high-order time integration schemes.
